ALARMS & TROUBLESHOOTING

The CADD-Legacy [®] PCA pump signals with audible alarms and messages that appear on the display when a condition requires your attention.		
Res Vol Low <i>⇔</i> Three beeps	Level of fluid in the reservoir is low. Prepare to install new reservoir.	
Reservoir Volume Empty &Two-tone alarm	Reservoir volume has reached 0.0 ml. Press NEXT or STOP/START to silence alarm. Install a new reservoir, if appropriate.	
Low Bat \$\overline 3 two-tone beeps every five minutes	Batteries are low, but pump is operable. Change batteries soon.	
Battery Depleted	Batteries are depleted and cannot operate pump; install new batteries immediately.	
Battery Removed Pump Won't Run <i>⇔Two-tone alarm</i>	With AC adapter attached, batteries have been removed while pump was running, or you have tried to start pump with depleted batteries. Install new batteries.	
High Pressure ⊕Two-tone alarm	High pressure is being caused by an occlusion in the fluid path between the pump and the patient. Remove the obstruction to resume operation. Or press STOP/START or NEXT to stop the pump and silence the alarm for two minutes, then remove occlusion and restart pump.	
Upstream Occlusion ⊕Two-tone alarm	Fluid is not flowing from the reservoir to the pump. Check for a kink or air bubble in the tubing between the reservoir and pump. Remove the occlusion to resume operation. Press STOP/START or NEXT to stop the pump and silence alarm for two minutes, then remove the occlusion and restart the pump.	
Screen Displays Current Pump Status &Two-beep (long-short) alarm	The cassette is not aligned with the pump, or is damaged, or a malfunction of the pump sensor[s] is occurring. Reposition the pump to silence the alarm. If repositioning the pump does not silence the alarm within two minutes, the pump will display "No Disposable, Clamp Tubing."	
Air In Line Detected <i>⇔Two-tone alarm</i>	Air in fluid path. Press NEXT or STOP/ START to silence alarm. Make sure tubing is threaded in air detector properly. If the fluid path contains air, close clamps, disconnect from patient and prime fluid path.	
Stopped <i>AThree beeps</i> <i>every five minutes</i>	Pump is stopped. Start pump, if appropriate.	
Remote Dose Cord Removed ATwo beeps when pump stopped, two-tone alarm when pump is running	Remote dose cord removed while pump was running.	
Programming Incomplete & Two-tone	Verify all programming screens by pressing ENTER/CLEAR before moving to next screen or starting pump.	

alarm when starting pump

next screen or starting pump.

ALARMS & TROUBLESHOOTING CONTINUED

Value Not Saved	A value was not saved by pressing ENTER/CLEAR. Press NEXT to resume programming.
Error ₽Two-tone alarm	An error has occurred. Remove pump from service.
No Message Displayed ATwo-tone alarm	The pump was running when batteries were removed or the batteries were removed within 15 seconds after stopping the pump. Batteries must be reinstalled.
	IMPORTANT: Always stop pump before removing batteries.
No Disposable, Clamp Tubing	The disposable was removed, or the cassette is not aligned with the pump or is damaged, or a malfunction of the pump sensor(s) is occurring. Clamp the tubing immediately. Press STOP/START or NEXT to silence the alarm.
Service Due &Two-tone alarm	The pump is due for service.

WARNING: This Quick Reference Card should be used by clinicians only. Do not permit patients to have access to this card, as the information would allow access to all programming and operating functions. Assistance with the CADD-Legacy[®] PCA pump is available to clinicians 24-hours-a-day by calling 1-800-258-5361.

CADD-Legacy[®] PCA

Infusion Pump Model 6300

Quick Reference Card for Clinicians Lock Level 0 (LL0)

A Display shows programmed values and messages

- **B** AC Adapter Jack used to plug in AC Adapter
- **C** Accessory Jack used to plug in Remote Dose Cord
- **D** Indicator Light indicates AC power in use
- E Air Detector
 - F Cassette (part of reservoir or administration set that attaches to pump)
 - G Threaded Mounting Hole for use with Polemount Bracket Adapter (back of pump)
 - H Battery Compartment (back of pump)
 - I Cassette Latch attaches cassette to pump (side of pump)

KEYPAD

STOP/START	Stops and starts the infusion
ENTER/CLEAR	Enters or clears displayed value
PRIME	Fills tubing with fluid
LOCK	Displays or changes Lock Level (security level)
NEXT	Advances to next programming screen
	Increases or decreases displayed values or scrolls through menu items
ON/OFF	Turns the pump on or off (low power)
DOSE	Delivers demand dose

Read the entire Operator's Manual before operating the CADD-Legacy® ambulatory infusion pump. Failure to properly follow warnings, cautions and instructions could result in death or serious injury to the patient.

CADD

Batteries must	IING / SET-UP SEQUENCE be installed; pump must be stopped and in LLO.	
NOTE: Value Not Saved is displayed if a value is scrolled and ELC. CLEAR is not pressed. Press NEXT to continue programming.		
	Warning: If the pump is dropped or hit, inspect it for damage. Do not use a pump that is damaged or is not functioning properly.	
Main Screen	Press NEXT.	
Enter Reservoir Volume	 Press Or to select desired Reservoir Volume. Press ENTER/CLEAR. Press NEXT. 	
Enter Units	 Press	
Enter	NOTE: This screen does not appear if	
Concentration		
	 Press or to select desired Concentration. Press ENTER/CLEAR. Press NEXT. 	
Enter Continuous Rate	 10. Press or to select desired Continuous Rate (select the upper limit if the program will be adjusted in LL1). 11. Press ENTER/CLEAR. 	
	12. Press NEXT. WARNING: This pump delivers medication at a constant rate and/or allows delivery of a bolus dose at a specified time interval. Programming the pump at a delivery rate other than what is prescribed will cause over or under delivery of medication.	
Enter Demand Dose	 Press or to select desired Demand Dose (select the upper limit if program will be adjusted in LL1). Press ENTER/CLEAR. Press NEXT. 	
*Enter Dose Lockout	WARNING: When you enter a new value, any lockout time in effect will be cleared. A demand dose could be requested immediately upon starting the pump, resulting in over-delivery.	
	 Press or to select desired Demand Dose Lockout. Press ENTER/CLEAR. Demand NEXT 	
Enter Doses Per Hour	 18. Press NEXT. NOTE: This screen will only appear if you have programmed a demand dose and dose lockout is less than 1 hour. 19. Press ▲ or ♥ to select desired Doses Per Hour. 20. Press ENTER/CLEAR. 21. Press NEXT. 	
*Clear Doses Given	 Press ENTER/CLEAR to clear the value for the number of doses given. The display will show 0. Press NEXT. 	
*Clear Doses Attempted	24. Press ENTER/CLEAR to clear the value for the number of doses attempted by the patient. The display will show 0.25. Press NEXT.	
Clear Given (ml, mg, mcg)	 Press ENTER/CLEAR to clear the given value. The display will show 0.00. Press NEXT. 	
Verify Air	28.Verify the setting is correct. (To change setting, see Biomed Functions section.)	
Detector Status	29. Press NEXT.	

I	*These screens will appear only if you have programmed a demand dose.

PROGRAMMING / SET-UP SEQUENCE CONTINUED

PUMP OPERATIONS CONTINUED		
Functions To Access To Turn Air Detector ON-HIGH, ON-LOW or OFF	 Pump must be stopped and in LLO. Press LOCK. Press LOCK or ENTER/CLEAR. Press Approver until the biomed code appears. Press LOCK or ENTER/CLEAR. Press NEXT to go through settings. Press NEXT until AIR DETECTOR appears. Press Approver until desired setting appears. Press NEXT. Press NEXT. WARNING: When the air detector is turned off, the pump will not detect air in the fluid path. Periodically inspect the fluid path and remove any air to prevent air embolism. 	
To Turn Upstream Sensor ON/OFF	 10. Press NEXT until UPSTREAM SENSOR appears. 11. Press or until desired setting appears. 12. Press ENTER/CLEAR. 13. Press NEXT. WARNING: When the upstream occlusion sensor is turned off, the pump will not detect occlusions upstream (between pump and reservoir). Periodically inspect the reservoir for decreasing reservoir volume and inspect the fluid path for kinks, a closed clamp, or other upstream obstructions. Upstream occlusions could result in under- or non-delivery of medications. 	
Functions	 Press NEXT until NEXT FOR BIOMED, ENTER FOR MAIN appears. Press ENTER/CLEAR to return to main screen. Or press NEXT to continue in Biomed settings loop. 	
PROGRAMMIN	IG SCREENS	
Main Screen Reservoir Volume Units Concentration Continuous Rate	Displays status of pump (STOPPED or RUN) Volume of fluid in reservoir Programming units (ml, mg, mcg) Concentration of medication in mg/ml or mcg/ml Continuous rate of infusion (ml/hr, mg/hr, mcg/hr)	
Demand Dose	Amount delivered when patient presses the DOSE key or Remote Dose Button	
Dose Lockout	Amount of time that must elapse between demand doses (appears if demand dose is programmed)	
Doses Per Hour	Maximum number of demand doses allowed in any one hour period (appears if demand dose is programmed and demand dose lockout is less than one hour)	
Doses Given	Displays number of demand doses given since screen was last cleared (appears if demand dose is programmed)	
_		
Doses Attempted	Displays number of demand doses attempted since screen was last cleared (appears if demand dose is programmed)	
Doses Attempted Given	since screen was last cleared (appears if	
	since screen was last cleared (appears if demand dose is programmed) Total amount of medication delivered since	

CHANGING THE CASSETTE

_		
	To Remove Used Cassette	 Stop the pump. Close all tubing clamps. Disconnect tubing from patient. Use key to unlock used cassette. Remove and discard used cassette.
	To Attach New Cassette	 Close all tubing clamps. Insert new cassette hooks into pump's hinge pins. Place pump with cassette on firm surface and
		 push down on top of pump so cassette fits tightly against the pump. 4. Insert a key into the lock, push in and turn until the line on the lock lines up with the arrow on the side of the pump. 5. Gently twist and pull on cassette to make sure it is attached properly. 6. Press SET/CLEAR to reset reservoir volume,
		if appropriate.7. If the Air Detector is in use, make a small loop of tubing underneath the air detector and hold it with your thumb. Place the tubing over the groove in the air detector and tuck it under the catch. Seat the tubing into the groove by gently pulling the tube upward until it is under the retention nubs and flat in the groove.
		WARNING: Attach the cassette (the part of the Medication Cassette reservoir or CADD° administration set that attaches to the pump) properly. An improperly attached or detached cassette could result in unregulated gravity infusion of medication from the fluid container or a reflux of blood. If you are using a CADD° administration set or Medication Cassette reservoir that does not have
		the flow stop feature (catalog number does not start with 21-73xx): You must use a CADD® extension set with an integral anti-siphon Valve or a CADD® administration set with either and integral or add on anti-siphon valve to protect against unregulated gravity infusion that can result from an improperly attached cassette.
	DOSING	
	To Start Demand Dose	Pump must be running. 1. Press DOSE or remote dose cord button. Note: If you wish to stop delivery of the demand dose, press and hold STOP/START to stop the pump.
5	To Start Clinician Bolus	 Pump must be running. 1. Press LOCK. 2. Press ♥ until Clinician Bolus Code appears. 3. Press LOCK or ENTER/CLEAR. 4. Press or ♥ to select desired amount. 5. Press DOSE or ENTER/CLEAR to start bolus. Note: If you wish to stop delivery of a clinician bolus, press and hold STOP/START to stop the pump.
	To Use the Remote Dose Cord/Button	 Use remote dose button on cord in same manner as DOSE key on pump keyboard. Attach the remote dose cord by inserting the connector into the accessory jack and pushing firmly until it snaps into place. Detach the remote dose cord by grasping the connector and pulling it out of the jack. Do not use excessive force or instruments, such as pliers, to remove the remote dose cord from pump.
